

SYN-FLOW

Multi-purpose Gel Lubricant Spray

Syn-Flow Multi-purpose Gel Lubricant Spray features **Synergel® SA V50**, a gelled solvent based on a proprietary system for thickening and gelling hydrocarbons. This innovative technology creates a higher viscosity fluid that is easily applied to the intended area with great adhesion and reduced dripping. The formulation utilizes **SACI® 4575**, a corrosion inhibitor and rust preventative additive.

The lubricant spray can be used to reduce friction and minimize wear on products such as wheels, hinges, and gears. It may also provide protection against various elements due to the film barrier created by the proprietary gellant system.

Procedure:

1. Combine all ingredients, heat to 60-65°C and mix until homogenous.
